Abhishek Kinagi

Director at Morgan Stanley | Equity Derivatives Technology | Ex-Goldman Sachs | MS in CS (ASU)

Bengaluru, India | kinagiabhishek@gmail.com | linkedin.com/in/kinagiabhishek | kinagiabhishek.github.io

EXECUTIVE SUMMARY

Director at Morgan Stanley in Equity Derivatives Technology with 6+ years architecting high-throughput financial platforms, distributed services, and enterprise data pipelines. Proven impact across Morgan Stanley, Goldman Sachs, and Numerify delivering distributed Java and Scala trading engines, migrating multi-project codebases onto centralized monorepos, and accelerating delivery velocity through mature agentic engineering pipelines (Claude Code, GitHub Copilot). MS in Computer Science from Arizona State University.

TECHNICAL ARSENAL

Core Languages:	Java (OpenJDK 26, Concurrency, Multithreading), Scala (Functional Systems), Python, Sybase SQL, Bash, C++
Platforms & Architectures:	Distributed In-House DocGen, High-Throughput Trade Capture, Spring Boot, Microservices, Sybase ASE, REST APIs
Agentic AI & Tooling:	Mature Agentic Pipelines (Epic-to-Deliverable), Claude Code, GitHub Copilot, Amp, Monorepo Build Tooling, Linux/UNIX
Data & Cloud Infrastructure:	AWS Redshift (Z-Standard Columnar Compression), Apache Spark ML, AWS RDS Lifecycle Automation, ETL Batch Pipelines

PROFESSIONAL EXPERIENCE

Director P3 — Equity Derivatives Technology · Morgan Stanley

April 2026 – Present | *Bengaluru, India*

- **In-House Document Generation (DocGen):** Architected and delivered an enterprise-grade document generation platform across distributed microservices, standardizing trade confirmation and term sheet workflows for front-office equity structured derivatives desks.
- **Enterprise Monorepo Modernization:** Spearheaded multi-project codebase migration onto a centralized repository and build framework, resolving dependency fragmentation, eliminating build drift, and hardening CI/CD reliability across services.
- **Fast Epic Delivery via Agentic Pipelines:** Leveraged mature AI agent development workflows (Claude Code, GitHub Copilot) to convert complex derivatives engineering epics into production-ready deliverable code in days.
- **High-Throughput Trade Capture Engine:** Engineered and optimized Java and Scala backends supporting high-volume, low-latency trade capture pipelines for sales and trading desks under Institutional Securities.
- **Production Operations & Stability:** Provided mission-critical production support for front-office trading workflows during market hours, driving rapid root-cause isolation and maintaining high operational uptime.

Technology Analyst — Private Wealth Management (PWM) · Goldman Sachs

October 2021 – April 2024 | *Dallas, Texas, USA*

- **Books & Records & Asset Servicing:** Engineered core transactional backends in Java, Sybase SQL, and Bash handling critical account records, reporting, and asset servicing workflows within Private Wealth Management.
- **Support Framework Automation:** Built automated application monitoring and incident resolution frameworks, reducing manual intervention by **25%**.
- **Database Scan Performance Optimization:** Re-architected batch scanning algorithms and query paths, improving turnaround time by **40%**.
- **Trade Validation & Staging:** Executed multi-scenario test trade booking pipelines under staging environments to validate record integrity for Quicken data feeds.

Associate Software Developer — Platform & ML · Numerify

July 2017 – April 2019 | *Bengaluru, India*

- **BI Application Modeler (MDAC):** Developed platform features for data transformation into AWS Redshift, implementing Z-Standard columnar compression to optimize warehouse storage.
- **Automated Restartable ETL Pipeline:** Built multi-phase batch data processing pipelines with automated checkpoint restart-ability, eliminating manual run intervention.
- **AWS Infrastructure Cost Optimization:** Automated dynamic startup/shutdown lifecycle hooks for AWS RDS instances during batch runs, delivering significant cloud infrastructure cost savings.
- **Spark Machine Learning Platform:** Provisioned Apache Spark ML pipeline execution infrastructure to train, test, and score predictive client metrics on data warehouse tables.

EDUCATION & CAMPUS LEADERSHIP

Arizona State University (Ira A. Fulton Schools of Engineering)
Master of Science (MS) in Computer Science • 2019 – 2021

Visvesvaraya National Institute of Technology (VNIT)
Bachelor of Technology (BTech) in Computer Science & Engineering • 2013 – 2017

VNIT Management & Campus Leadership (4 Years, 2013 – 2017): Managed institute-wide event operations, annual budgeting, logistics, and multi-department teams across 4 continuous years for major technical and cultural festivals, coordinating cross-functional student bodies and university administration.
