Abhishek Kinagi

Director @ Morgan Stanley • Equity Structured Products • Department AI Innovator

Bengaluru, India | kinagiabhishek@gmail.com | linkedin.com/in/kinagiabhishek | kinagiabhishek.github.io

EXECUTIVE SUMMARY

Director at Morgan Stanley (Equity Structured Products - IST) with 6+ years specializing in distributed systems, high-throughput financial architectures, and agentic AI transformation. Department innovator pioneering mature multi-agent engineering pipelines that convert product epics into verified production code in days. Proven track record across Morgan Stanley, Goldman Sachs, and Numerify delivering resilient trading platforms, automated test suites for multi-dependency services, and large-scale data systems. MS in CS from Arizona State University.

TECHNICAL ARSENAL

Agentic AI & Tooling:	Mature Agentic Pipelines (Epic-to-Deliverable in days), Claude Code, Amp, GitHub Copilot, Autonomous Subagents, Prompt Engineering
Testing & Resiliency:	Full Multi-Dependency Service Test Automation, Mockless Contract Verification, Playwright, Selenium, OpenJDK Assertions
Core Languages:	Java (OpenJDK 26, Concurrency, Streams API), Scala (Functional Systems), Python, C++, Sybase SQL, Bash
Platforms & Systems:	High-Throughput Trade Capture, Automated Document Generation (DocGen), Spring Boot, Distributed Microservices, Sybase ASE, AWS Redshift, Apache Spark ML

PROFESSIONAL EXPERIENCE

Director P3 — Equity Structured Products · Morgan Stanley

April 2026 – Present | *Bengaluru, India*

- **High-Throughput Platforms:** Architect and enhance in-house trade capture and document generation backends in Java and Scala for front-office sales and trading desks handling complex structured equity derivatives.
- **Department AI Innovator & Agentic Pipelines:** Pioneered mature agentic workflows department-wide, architecting multi-agent pipelines that convert product epics into production-ready, verified code in days rather than sprints.
- **Multi-Dependency Test Automation:** Engineered end-to-end automated test suites for deeply coupled microservices, eliminating manual testing toil and catching integration regressions pre-merge.
- **AI Skills Leadership & Adoption:** Department leader in AI capability development, training teams on autonomous developer tools (Claude Code, Amp, GitHub Copilot) and enforcing AI-first engineering standards.
- **Monorepo Modernization:** Migrated legacy repositories onto centralized build systems, streamlining dependency trees and CI/CD reliability.

Technology Analyst — Private Wealth Management (PWM) · Goldman Sachs

October 2021 – April 2024 | *Dallas, Texas, USA*

- Engineered core Books & Records and Asset Servicing engines using **Java, Sybase SQL, and Bash scripting**.
- Automated software support and incident response frameworks, reducing manual intervention by **25%**.
- Optimized database scanning queries and reporting pipelines, improving turnaround time by **40%**.
- Executed trade booking validations under test environments for Quicken data integrity verification.

Associate Software Developer — Platform & ML · Numerify

July 2017 – April 2019 | *Bengaluru, India*

- Contributed to the **Metadata Driven Application Console (MDAC)** BI Modeler for customer data warehousing on AWS Redshift, implementing Z-Standard columnar compression.
- Automated restartable ETL batch data pipelines, eliminating manual intervention across execution phases.
- Provisioned Spark ML model execution platform to predict operational metrics on enterprise client datasets.
- Automated AWS RDS server startup/shutdown hooks, delivering significant cloud infrastructure cost savings.

EDUCATION & CAMPUS LEADERSHIP

Arizona State University (Ira A. Fulton Schools of Engineering)
Master of Science (MS) in Computer Science • 2019 – 2021

Visvesvaraya National Institute of Technology (VNIT)
Bachelor of Technology (BTech) in Computer Science & Engineering • 2013 – 2017

VNIT Management & Campus Leadership (4 Years, 2013 – 2017): Managed institute-wide event operations, annual budgeting, logistics, and multi-department teams across 4 continuous years for major technical and cultural festivals, coordinating cross-functional student bodies and university administration.
